Books connect the world

The cultural excitement and the quality of the offer represented by Italian independent publishers has allowed them to reach a share of about 50% in the book market.

The new, decisive Law for Books and Reading - that safeguards both bibliodiversity and the market - which the Senate unanimously approved in 2020, after ten years of hard work, is due to the determination of independent publishers and booksellers Associations, together with a Cultural Ministry sensitive to the needs of one of culture's economic pillars. ADEI – Associazione degli Editori indipendenti italiani *i.e. Association of Italian Independent Publishers* – represents about 250 independent publishers, some Regional Associations, and is the promoter of an important independent book fair that takes place both in Milan and Genoa.

This first international catalogue, published for the 2022 Frankfurter Buchmesse, is a further signal of the liveliness and variety of ideas, projects, and colours of the Italian 'indie' World. It marks an important step towards openness to debate not only among publishers, but also with book organizations, associations, and book events all around the World.

In such a delicate moment for international relations, we think this represents both a concrete instrument and a positive emblem of cultural exchange and friendship.
